

Transitioning to ICD-10

Presented by:
The Centers for Medicare & Medicaid Services

ICD-10 Basics ICD-10 Implementation

ICD-10 Compliance Date

 The compliance deadline for ICD-10-CM and PCS is October 1, 2014

ICD-10 DEADLINE Oct 1, 2014

What is ICD-10?

In 1990, the World Health Organization (WHO) approved the 10th Revision of the International Classification of Diseases (ICD), which is known as ICD-10.

What

- A method of coding:
 - The patient's state of health and
 - > Institutional procedures
- In the U.S., ICD-10 includes:
 - ICD-10-CM: clinical modification of WHO standard for diagnoses that is maintained by NCHS and is for specific use in the U.S.
 - ICD-10-PCS: inpatient procedures developed and maintained by CMS

Why

- ICD-10-CM and PCS are complete revisions of their U.S. developed ICD-9 counterparts, which were adopted in 1979
 - ➤ More information per code
 - Better support for care management, quality measurement, & analytics
 - Improved ability to understand risk and severity

Who

 All HIPAA-covered entities must use ICD-10 for information they transmit electronically

When

- Compliance Date: 10/1/14
 - Outpatient services are based on the Date of Service
 - Inpatient services are based on the Date of Discharge

Why ICD-10 Matters

- ICD-10 Advances Health Care and Implementation of eHealth Initiatives
- ICD-10 Captures Advances in Medicine and Medical Technology
- ICD-10 Improves Data for Quality Reporting
- ICD-10 Improves Public Health Research, Reporting and Surveillance

ICD-10 Compliance

Opportunities for Compliance

- Improve accuracy of payment policies and implementation of payment policies
- Improve coding practices & claims payment accuracy and efficiency
- Enhanced fraud, waste, abuse prevention and detection
- Foundational for health care reform
- Better quality measurement through improved identification of patient populations
- More accurate understanding of population health
- Enhanced research and analytics

Risks of Non-Compliance

- Incorrect or slow claims payment
- Increased risk of improper payments
- Increased error rates
- Penalties for non-compliance
- Increased appeals and customer service volume
- Incorrect or slow Medicare as a Secondary Payer and Coordination of Payments processes
- Disruptions in research, analytics, and longitudinal reporting
- Disruptions to surveillance and public health reporting

CMS

ICD-10 Implementation

CMS ICD-10 Implementation Today

Medicare Implementation

- The Medicare implementation is on track.
- Internal testing started.

State Medicaid Agencies

- CMS conducted a State assessment in January 2013 and in early May 2013. May results currently are being compiled.
- Assessment response rate was 94% in January 2013.

Providers

- Health plans, clearinghouses, large physician practices and hospitals are on target for ICD-10 implementation.
- CMS is providing small physician practices with additional technical assistance.

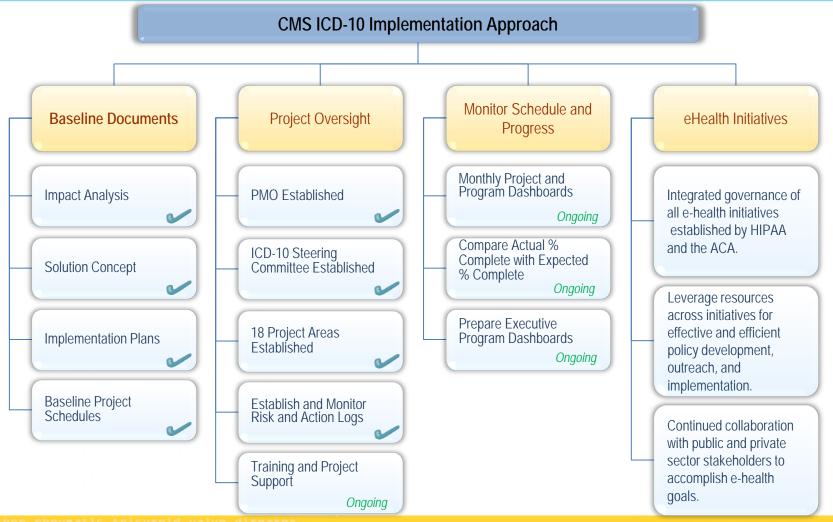

Vendors

Vendors are having discussions with their customers to ramp up ICD-10 efforts.

CMS ICD-10 PMO Approach

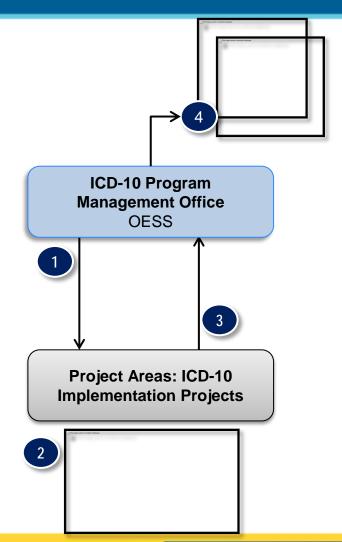

CMS ICD-10 Reporting Structure

- Project Areas report schedule updates, risk, issues to the PMO.
 - The PMO distributes a Project Input Dashboard every two weeks.
 - 2. The Project Area Lead uses the *Project Input Dashboard* to update the schedule and communicate risks and submits to the PMO.
 - The Project Area Lead submits the Project Input Dashboard to the PMO.
 - 4. The PMO aggregates the input and:
 - Updates the master schedule
 - Creates Program Dashboards and reporting for the Steering
 Committee

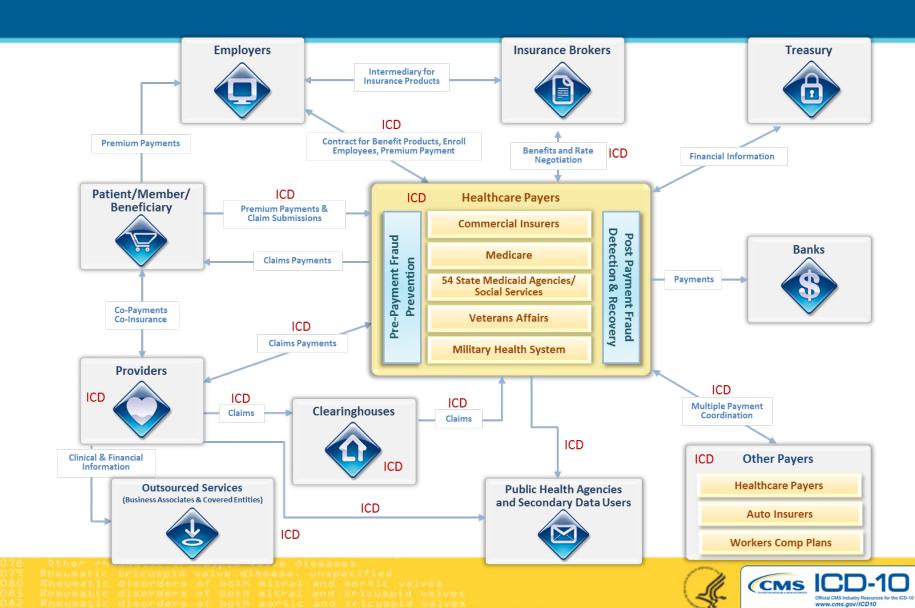

Providers ICD-10 Implementation

ICD-10 Impact Across the Industry

ICD-10 Timeline for Providers and Payers

ICD-10 and Physician Practices

NURSES

- Forms: Every order must be revised or recreated.
- Documentation: Must use increased specificity.
- Prior Authorization: Policies may change, requiring training and updates.

PHYSICIANS

- Documentation: The need for specificity dramatically increases by requiring laterality, stages of healing, weeks in pregnancy, episodes of care, and much more.
- Code Training: Code increases from 17,000 to 140,000. Physicians must be trained.

CLINICAL

- Patient Coverage: Health plan policies,
- payment limitations, and new ABN forms.
- Superbills: Revisions required and paper superbills may be impossible.
- ABNs: Health plans will revise all policies linked to LCDs or NCDs, etc., ABN forms must be reformatted, and patients will require education.

MANAGERS

- New Policies and Procedures: Any policy or procedure associated with a diagnosis code, disease management, tracking, or PQRI must be revised.
- Vendor and Payer Contracts: All contracts must be evaluated and updated.
- Budgets: Changes to software, training, new contracts, and new paperwork will have to be paid for.
- Training Plan: Everyone in the practice will need training on the changes.

LAB

- Documentation: Must use increased specificity.
- Reporting: Health plans will have new requirements for the ordering and reporting of services.

BILLING

- Policies and Procedures: All payer reimbursement policies may be revised.
- Training: Billing department must be trained on new policies and procedures and the ICD-10-CM code set.

CODING

- Code Set: Codes will increase from 17,000 to 140,000. As a result, code books and styles will completely change.
- Clinical Knowledge: More detailed knowledge of anatomy and medical terminology will be required with increased specificity and more codes.
- Concurrent Use: Coders may need to use ICD-9-CM and ICD-10-CM concurrently for a period of time until claims are resolved.

FRONT DESK

- HIPAA: Privacy policies must be revised and patients will need to sign the new forms.
- Systems: Updates to systems may impact patient encounters.

ICD-10 Policy Briefs

 Demonstrations of how ICD-10 supports the Triple Aim through state programs for 9 different policies

Health Condition Categories

 A foundation for SMAs to define health conditions in alignment with the needs of their specific agency

Health Condition Categories

- Affective Disorders
- Anxiety Disorders
- Attention Deficit
 Disorders
- Autism Spectrum Disorders
- Schizophrenia
- Substance Abuse
- Coronary Heart Disease
- Heart Failure
- Hypertension
- Myocardial Infection
- Cleft Lip/Palate
- Cerebral Palsy
- Diabetes Mellitus
- Hemophilia
- Leukemia

- AIDS/HIV
- Hepatitis
- Lung Cancer
- Brain Injury
- Chronic Dementia
- CVA
- Epilepsy
- Fetal Maturity/ Development
- High Risk Pregnancy
- Asthma
- COPD
- End-Stage Renal Disease
- Male related Conditions
- Female related Conditions
- Hip Fracture

- Defines 30 health conditions and code sets universally important to State Medicaid Agencies
- Informs ICD-10 transition business and operational requirements
- End users: Medical staff, policy personnel, coding professionals, coding auditors,
 - reporting and business analysts

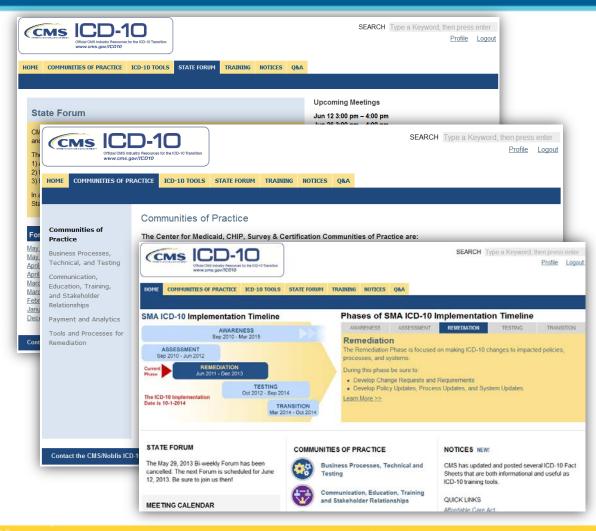

State Medicaid Agencies ICD-10 Collaboration Site

- Provides an online community and repository for State Medicaid Agencies
- Provides SMA related ICD-10 resources from CMCS and SMAs
- Includes calendar of events for Medicaid ICD-10

Policy Remediation Workshop

kneumatic disorders of both aortic and tricuspid valves Combined rheumatic disorders of mitral, aortic and tricuspid valve

SMA ICD-10 Technical Assistance & Training

- Site Visits are customized to each state's needs and progress
 - 8 Training Modules available for the states to choose from
- Conducted Regional Office visits
- Conducted 29 State Site visits (6 additional scheduled)
- Conducted 5 Policy Remediation Site visits (5 additional scheduled)

ICD-10 SMA Site Visit Training Content

- Illustrates some of the key business reasons that executives, directors, managers and all aspects of the organization should care about the implementation of ICD-10.
- Identifies the SMA core business functions and the ICD-10 impact.

Why Should I Care?

"Top Ten Reasons"

- 1. It's the law
- 2. Budget uncertainty
- 3. Provider relations
- 4. Program integrity
- 5. Analytic uncertainty
- Major policy and rule rewrite
- Unpredictable DRG Assignment
- 8. Changes to quality measures
- 9. Potential mandate changes
- Unpredictable contract changes

Some of the reasons are:

- No payment for claims with ICD-9 codes with dates of service or discharge dates after Oct 1 2014
- Lack of historical experience in projecting trends
- Provider education
- Categories of services and conditions will be completely redefined.
- Redefinition of quality measure numerator and denominator criteria

Impact to SMA

- Claims Processing
- Product Development
- Enrollment Management
- Reimbursement / Network Management
- Customer Service
- Care Management
- Quality Management
- Vendor Management
- Impact to Production

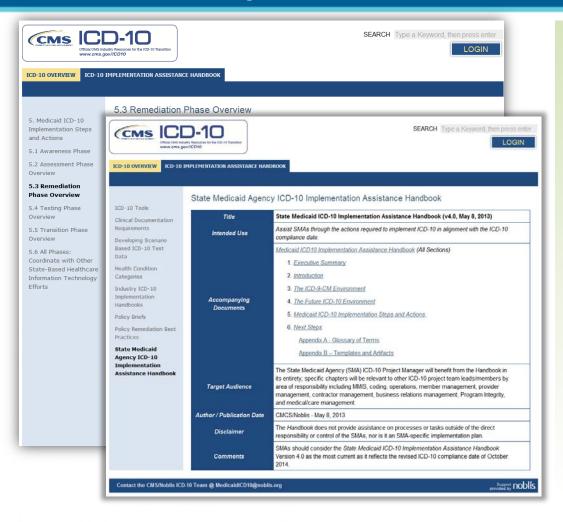

Some impacts are:

- Accuracy of payments (i.e. DRG, provider contracts, policy remediation)
- Significant modification to SMA MMIS systems, infrastructure and IVR equipment.
- Impact to HEDIS measures
- Tools/criteria used to determine Vendor and business partner
- Defining vendor/businessreadiness

ICD-10 State Medicaid Agency Implementation Handbook

- Contains information on the following core topics:
 - Limitations of the current
 ICD-9-CM code set
 - Benefits of implementing ICD-10
 - ICD-10 milestones
 - Key activities
 - Strategies and activities required to implement ICD-10 during the five implementation phases.

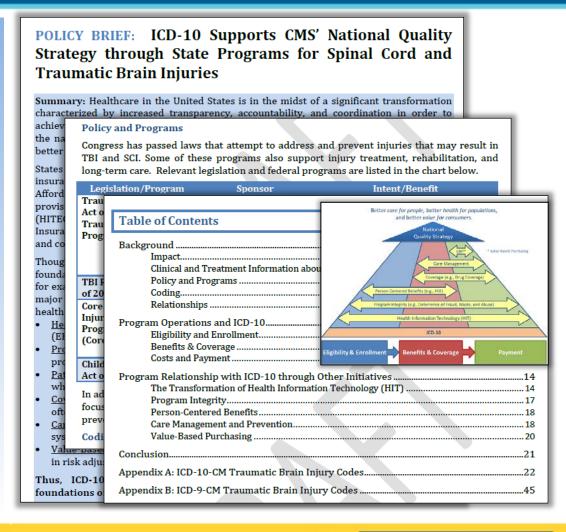

Nine Policy Briefs Show How ICD-10 Supports Healthcare Transformation for:

- CHIP
- Pregnancy
- Breast & Cervical Cancer Prevention
- HIV/AIDS
- Alzheimer's Disease
- Autism Spectrum Disorders
- Traumatic Brain and Spinal Cord Injuries
- Intellectual Disability
- Coordination of Care

...in State Medicaid Programs
