**WORD
OF THE YEAR**

post-truth

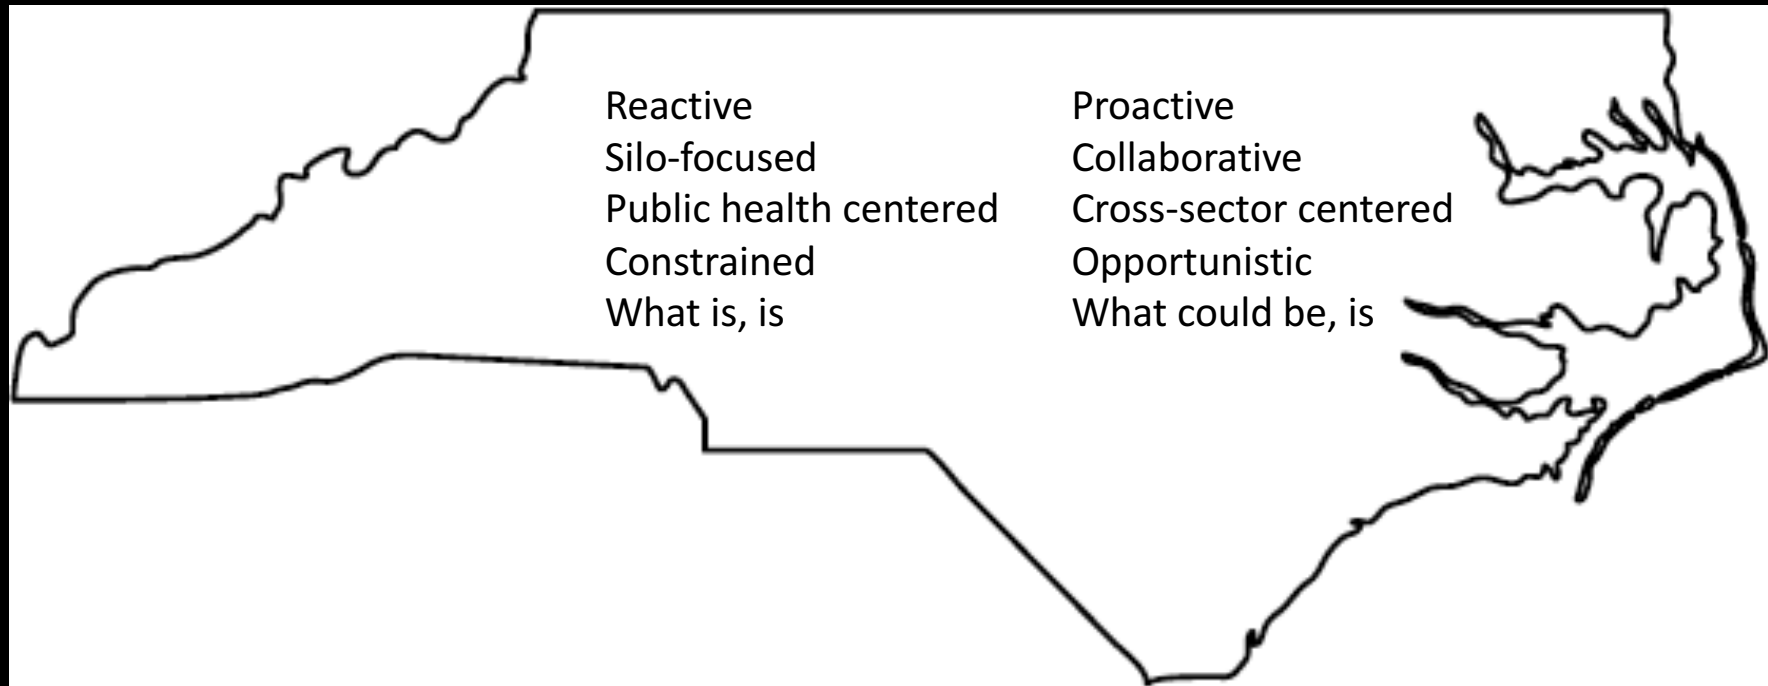

What do leaders do in
times of uncertainty?

Three major choices...

- Times of change and uncertainty call for leadership.
- Leadership is the practice of vision-setting and motivating others to share that vision as their own, and working together to achieve it.

What is your vision for a healthy North Carolina?

This is
government
stupid... are you
totally nuts?

Recession

Affordable Care Act

2012 IOM *For the Public's Health Reports*

PUBLIC HEALTH 3.0

RECOMMENDATIONS

Public health leaders should embrace the role of **Chief Health Strategist for their communities**—working with all relevant partners so that they can drive initiatives including those that explicitly address “upstream” social determinants of health. Specialized Public Health 3.0 training should be available for those preparing to enter or already within the public health workforce.

- Inside-out leaders create **future focused, collaborative and visionary strategies** for their organizations
- Sustainability strategy = cross-sector work **showing value to stakeholders** beyond your own health agency
- Adaptive strategy = reframe the work of public health to focus on **population health**
 - Show return on investment, value
 - Link to business, growth, job creation (non-governmental)
 - Beware of the “pocket problem”

U.S. life expectancy declines for the first time since 1993

By Lenny Bernstein December 8, 2016

Life expectancy at selected ages, by sex (CDC/NCHS/HHS/NVSS)

Focus on preventive health care

As reported in the Dec. 8 front-page article “Expected life span declines in America,” the health of our nation is in trouble: Children who live in the United States may live shorter and less healthy lives than their parent’s generation. There are many reasons for this decline. First and foremost, we continue to focus on health-care service delivery and medical intervention after people get sick, and we fail to invest in prevention efforts that keep us healthy in the first place.

The time is now to reorient the work of the U.S. health-care system toward prevention and to invest in these efforts at the local, state and national levels. If we truly want a health-care system versus a “sick-care” system, we have to focus on the things that keep us healthy. That is the job of public health, and we need it now more than ever.

As efforts to repeal and replace the Affordable Care Act (ACA) begin, the debate continues on what will happen to the millions of Americans who are currently receiving coverage and what it will mean for their health. But that's only half the debate.

Few are talking about another extremely important part of the ACA, the Prevention and Public Health Fund, which provides major investments in prevention and public health programs that significantly contribute to better health outcomes and reduce healthcare costs.

The Prevention and Public Health Fund, established by the ACA, was designed as a resource for disease prevention and health promotion efforts. Its goal is to support public health programs that prevent illness and disease. Most deaths (nearly 70%) are caused by chronic diseases, such as cancer, stroke, heart

LOAD MORE

Repeal of ACA means real cuts to public health agencies if nothing is done to replace it.

North Carolina: At-Risk for Immediate Losses Use of CDC Prevention Funds in the State Annually	
Annual Prevention Fund Grants to States (based on FY 2016)	\$17,183,464
Vaccines to Needy Children and Adults (based on FY 2015)	\$731,767
Core State-Health Needs (identified by state department of health) (based on FY 2015)	\$4,094,772
Infectious Disease Prevention and Healthcare-Associated Infections (based on FY 2015)	\$711,536
Chronic Disease Prevention including diabetes, heart disease and stroke, and tobacco cessation (based on FY 2016)	\$5,704,727

Amounts each state stands to lose over the next 5 years if the Prevention Fund was repealed (based on fiscal year 2016 grants to state) include:

Prevention and Public Health Fund: Potential Loss of Funding in The Next Five Years, Based on Fiscal Year 2016 Awards Granted by CDC to States

Stories of Impact – One State's Examples

- “The Department would lose its ability to continue immunization infrastructure work until the end of the project period. A loss of funding would potential results in staff layoffs and discontinuation of work with health care providers...”
- “...A reduction or elimination of the PPHF would greatly impact, or shut down, the QuitLine and SmartApp, which provides telephone-based counseling and web0based resources to help tobacco users quit...”
- “Outbreak investigation and reporting on tick surveillance and daily lab support for routine diagnostic and surveillance testing activities would be eliminated...”

RE: ACA Repeal and Replace and its Impact on State and Territorial Public Health

Last week the Senate Budget Committee began Senate floor consideration of the vehicle and concluded action passing the budget resolution early yesterday morning. The measure is expected to easily pass. Committees with authority and jurisdiction in the Senate have also received instructions to send the budget committees their instruction on January 27. This will officially begin the process of "repeal and replace" of the ACA.

The Honorable Nancy Pelosi
Democratic Leader
United States House of Representatives
Washington, DC 20515

Dear Leader McConnell, Minority Leader Schumer, Speaker Ryan, and Democratic Leader Pelosi:

As nonpartisan, consensus-driven national organizations representing state, territorial, and local governmental public health leaders we respectfully request your continued support for vital public health programs currently funded through the Affordable Care Act's (ACA) Prevention and Public Health Fund. State, territorial, and local health leaders are concerned that long-standing public health programs now receiving resources through the Fund authorized by the ACA may be rescinded in repeal and replace efforts if we do not quickly identify alternative ways to invest in prevention and the support the life-saving work of state and territorial health agencies. We ask that you delay any efforts to rescind Prevention and Public Health Fund dollars to ensure that state and local public health is not crippled in the middle of fiscal year 2017.

Ways and Means Republicans ready to grow the economy, help Americans

BY REP. KEVIN BRADY (R-TEXAS) - 01/11/17 01:00 PM EST [33](#)

Human Resources

Over the coming year, our Human Resources Subcommittee will continue to focus on advancing solutions to help more families climb the economic ladder and escape poverty. We will continue taking action to ensure the programs under our Committee's jurisdiction are encouraging and rewarding work rather than replacing it. In addition, we will advance evidence-based reforms to fund more programs that actually work, such as the Maternal, Infant, and Early Childhood Home Visiting program, which has delivered positive results for families by empowering parents to achieve better outcomes for themselves and their children.
